

365

365

BUILT TO **OUTPERFORM** YOUR EXPECTATIONS.

Peterbilt's powerful and versatile Model 365 is built to meet the daily challenges of mixer duty, various construction sites and virtually any vocational application. With a compact 115-inch BBC, the Model 365 features improved ride and handling and increased maneuverability. The lightweight all-aluminum cab, with lap seam construction and bulkhead style doors, provides years of virtually watertight performance. Enhanced weight distribution on the Model 365 allows for increased payloads to maximize efficiency and profitability, while the chassis complies with state and federal bridge law regulations. For versatility, the Model 365 is available with the full range of Peterbilt sleepers or as a day cab. On-the-job performance, maximum durability and exceptional versatility and reliability – that's the Peterbilt Model 365.

For more information on the Model 365, contact your local Peterbilt dealer or visit www.peterbilt.com

An advanced composite hood provides exceptional durability, and the stainless steel grille protects the cooling system. The dramatic slope of the hood improves forward visibility.

CAB INTERIOR

The rugged interior features five grab handles, a powerful HVAC system and a durable charcoal-colored dash that is easy to clean and shows less scuffs and scratches.

VERSATILITY

Set-back front axle configurations are available with FEPTO and all set-forward axle configurations are available with REPTO for versatility with job-specific applications.

PACCAR MX ENGINE

The MX Engine delivers maximum performance and is available with a wide range of horsepower and torque options. Each offers superior fuel efficiency, longer service intervals, lower operating costs and higher resale value.

RELIABILITY

A multiplex electrical system offers diagnostic simplicity and reliability. The Electronic Service Analyst monitors the system, isolates sensors and gauges, and maintains an event log.
